Hanford Site Environmental Surveillance Master Sampling Schedule for Calendar Year 2011

LE Bisping

January 2011

Prepared for
the U.S. Department of Energy
under Contract DE-AC05-76RL01830

Pacific Northwest National Laboratory
Richland, Washington 99352

Summary

Environmental surveillance of the Hanford Site and surrounding areas is conducted by Pacific Northwest National Laboratory for the U.S. Department of Energy (DOE).¹ Sampling is conducted to evaluate levels of radioactive and nonradioactive pollutants in the Hanford Site environs, as required in DOE Order 450.1A, “Environmental Protection Program,” and DOE Order 5400.5, “Radiation Protection of the Public and the Environment.”^{2,3} The environmental surveillance sampling design is described in the Hanford Site *Environmental Monitoring Plan, United States Department of Energy, Richland Operations Office* (DOE/RL-91-50).⁴

This document contains the calendar year 2011 schedule for the routine collection of samples for the Surface Environmental Surveillance Project (SESP) and the Drinking Water Monitoring Project (DWMP). Each section includes sampling locations, sampling frequencies, sample types, and analyses to be performed. In some cases, samples are scheduled on a rotating basis. If a sample will not be collected in 2011, the anticipated year for collection is provided. Maps showing approximate sampling locations are included for media scheduled for collection in 2011.

Surface Environmental Surveillance Project Sampling

The SESP is a multimedia environmental surveillance effort to measure the concentrations of radionuclides and chemicals in environmental media to demonstrate compliance with applicable environmental quality standards and public exposure limits, and assess environmental impacts. Project personnel annually collect selected samples of ambient air, surface water, agricultural products, fish, wildlife, and sediments. Soil and vegetation samples are collected approximately every 5 years. Analytical capabilities include the measurement of radionuclides at environmental concentrations and in selected media; and nonradiological constituents including metals, anions, volatile organic compounds, and total organic carbon.

Drinking Water Monitoring Project Sampling

Mission Support Alliance, LLC is responsible for monitoring the quality of drinking water supplied by DOE to its onsite facilities in accordance with federal and state regulations. Pacific Northwest National Laboratory conducts radiological monitoring of onsite drinking water for Mission Support Alliance, LLC concurrent with SESP activities to promote sampling efficiency and consistency; use expertise developed over the years; and reduce costs associated with management, sample collection, procedure development, analytical contracting, data management, quality control, and reporting.

¹ Pacific Northwest National Laboratory is operated by Battelle for the U.S. Department of Energy.

² DOE Order 450.1A. 2008. “Environmental Protection Program.” U.S. Department of Energy, Washington, D.C.

³ DOE Order 5400.5, Chg 2. 1993. “Radiation Protection of the Public and the Environment.” U.S. Department of Energy, Washington, D.C.

⁴ DOE/RL-91-50, Rev. 4. 2008. *Environmental Monitoring Plan, United States Department of Energy, Richland Operations Office*. U.S. Department of Energy, Richland Operations Office, Richland, Washington.

Data Management

The Hanford Environmental Information System (HEIS) database is used as a repository for data gathered during environmental surveillance activities at the Hanford Site. For ease in retrieving SESP or drinking water data from the HEIS database, the majority of the location names in this document are the location names used in the database.⁵

Schedule Changes

This schedule is subject to modification during the year in response to changes in Hanford Site operations, program requirements, and the nature of the observed results. Operational limitations such as weather, mechanical failures, sample availability, and other factors may also impact scheduled sampling. Therefore, this document may not be an accurate record of samples collected during the year.

Multi-Agency Samples

By joint agreement, some samples are collected by SESP personnel and provided to the Washington State Department of Health. All planned cooperative sampling efforts are indicated in this schedule.

Acronyms and Symbols

Acronyms

ALE	Fitzner/Eberhardt Arid Lands Ecology Reserve
DOE	U.S. Department of Energy
DOH	Washington State Department of Health
DR	downriver
DWMP	Drinking Water Monitoring Project
FFTF	Fast Flux Test Facility
HEIS	Hanford Environmental Information System
HRM	Hanford River Marker
ICP-MS	inductively coupled plasma mass spectrometry
NASQAN	National Stream Quality Accounting Network
PNNL	Pacific Northwest National Laboratory
PRD	Priest Rivers Dam
SESP	Surface Environmental Surveillance Project
UR	upriver
USGS	U.S. Geological Survey

Frequency Symbols Used

A	annually
BE	biennially (every 2 years)
BW	biweekly (every 2 weeks)
M	monthly
M Comp.	monthly composite
Q	quarterly
Q Comp.	quarterly composite
SA	semiannually (twice each year)
TE	triennially (every 3 years)

Analytical Symbols Used

Generally, standard element, chemical, and isotope designations are used to indicate the analyses performed. Other analytical designations used include the following:

Alpha	gross alpha activity of sample
Anions	major anions – generally chloride, fluoride, nitrate, nitrite, sulfate
Beta	gross beta activity of sample

Gamma Scan	analysis of photon energy spectrum for individual photon-emitting radionuclides
HTO	tritiated water (${}^3\text{H}{}^1\text{H}{}^{16}\text{O}$)
Hg-CVAA	mercury by cold vapor atomic absorbance spectrometry
Hg-CVAF	total mercury in water by cold vapor atomic fluorescence
ICP-MS	major metals by inductively coupled plasma mass spectrometry – samples unfiltered unless otherwise noted
Lo ${}^3\text{H}$	low-level method for the electrolytic enrichment of tritium
Pu	isotopic plutonium (${}^{238}\text{Pu}$, ${}^{239/240}\text{Pu}$)
TOC	total organic carbon
U	isotopic uranium (${}^{234}\text{U}$, ${}^{235}\text{U}$, ${}^{238}\text{U}$)
VOA	volatile organic compounds

300 Area Outfl13	Grab	Q A	Lo ³ H, ⁹⁰ Sr, U, Anions ICP-MS, ICP-MS Filtered

(a) Refer to Figure 2.1, “2011 Surface Water and Drinking Water Sampling Locations.” Hanford River Markers (HRMs) are a series of signposts along the Hanford Site shoreline of the Columbia River that are roughly 1.6 km (1 mi) apart. The Vernita Bridge is HRM #0 and Ferry Street in Richland is HRM #46. Samples collected between HRMs are assigned a decimal.

(b) Sample is collected weekly and composited monthly for analysis.

(c) Additional sample provided to the DOH (January and June only).

(d) Sample is collected biweekly and composited for analysis.

(e) Analyses are performed by the U.S. Geological Survey (USGS) in conjunction with the National Stream Quality Accounting Network (NASQAN) Program, and include conductance, pH, temperature, turbidity, dissolved oxygen, hardness, Ca, Mg, alkalinity, carbonates, sulfate, Cl, F, solids, NH₄-N, NO₃+NO₂, N-Kjeldahl, P, Cr, Fe, and dissolved organic carbon.

(f) Quality assurance sample submitted for analyses twice per year.

(g) Samples collected from cross-river transects and near-shore locations.

(h) Quality assurance sample submitted for analyses once per year.

(i) Additional sample provided to the DOH.

(a) Refer to Figure 2.1, “2011 Surface Water and Drinking Water Sampling Locations.”
 (b) Sample is collected monthly and composited for quarterly analysis.
 (c) Sample is collected and analyzed quarterly and then composited for annual analysis.
 (d) Additional sample provided to the DOH for ³H analysis (January only).
 (e) Additional sample provided quarterly to the DOH for annual ⁹⁰Sr analysis.

4.0 Biota

4.1 Food and Farm Products

4.1.1 Milk

Location ^(a)	Frequency	Analyses
East Wahluke Area ^(b)	Q	Lo ³ H, ⁹⁰ Sr, Gamma Scan
Sagemoor Composite ^(b,c)	Q	Lo ³ H, ⁹⁰ Sr, Gamma Scan
Sunnyside Area	Q	Lo ³ H, ⁹⁰ Sr, Gamma Scan

(a) Refer to Figure 4.1, “2011 Food and Farm Products Sampling Locations.”
(b) Sample composited from multiple dairies in each area.
(c) Quality assurance sample submitted for analyses once per year.

4.1.2 Leafy Vegetables

Location ^(a,b)	Frequency ^(c)	Analyses/Agency
Riverview Area	A	⁹⁰ Sr, Gamma Scan/DOH ^(d)
Sunnyside Area	A	⁹⁰ Sr, Gamma Scan
Sagemoor Area	BE (2011)	⁹⁰ Sr, Gamma Scan/DOH ^(d)
East Wahluke Area	BE (2012)	⁹⁰ Sr, Gamma Scan/DOH ^(d)

(a) Refer to Figure 4.1, “2011 Food and Farm Products Sampling Locations” identifying those locations scheduled for collection in 2011.
(b) Two samples collected for Pacific Northwest National Laboratory (PNNL) within each area; one sample is analyzed and one is archived.
(c) Samples are collected in 2011 according to their specified frequency unless otherwise noted.
(d) Additional sample provided to the DOH.

4.1.3 Vegetables

Location ^(a,b)	Sample Type	Frequency ^(c)	Analyses/Agency
Riverview Area ^(d)	Potatoes	A	⁹⁰ Sr, Gamma Scan/DOH ^(e)
Sunnyside Area	Potatoes	A	⁹⁰ Sr, Gamma Scan
East Wahluke Area	Potatoes	A	⁹⁰ Sr, Gamma Scan/DOH ^(e)
Horn Rapids Area	Potatoes	BE (2011)	⁹⁰ Sr, Gamma Scan/DOH ^(e)
Sagemoor Area	Potatoes	TE (2012)	⁹⁰ Sr, Gamma Scan/DOH ^(e)

(a) Refer to Figure 4.1, “2011 Food and Farm Products Sampling Locations” identifying those locations scheduled for collection in 2011.
(b) Two samples collected for PNNL within each area; one sample is analyzed and one is archived.
(c) Samples are collected in 2011 according to their specified frequency unless otherwise noted.
(d) Other vegetables may be substituted if potatoes are not available.
(e) Additional sample provided to the DOH.

4.1.4 Fruits

Location ^(a,b)	Sample Type	Frequency ^(c)	Collection Period	Analyses/Agency
Sagemoor Area	Cherries	TE (2011)	June	⁹⁰ Sr, Gamma Scan/DOH ^(d)
